Dear Friends and Colleagues,

I am very pleased to invite and present you the 2nd Piezosurgery International Symposium, it will be held in Florence, Italy on June 13,14, and 15, 2013 at Congress Palace. Every two years the greatest experts of piezoelectric bone surgery come together for three days to determine "state of the art" and future prospects of this fundamental discipline in dentistry. This Symposium is a unique opportunity to learn -in an organized and effective manner- all the advantages in oral surgery, implantology and orthodontics. The topic was chosen to provide operators with clinical indications for their practical needs and to diffuse proficiency and knowhow. The Symposium is organized in three days: on the first day the themes of research in piezoelectric surgery will be discussed with emphasis end the first ten years of experience in the maxillary sinus augmentation with the use of ultrasonic instrumentation; the second day will be dedicated to implantology with particular regard to site preparation and finally, on Saturday top speakers will discuss surgically driven orthodontics and innovations on orthognatic surgery. We invited those top international speakers who are already using their innovative skills in the every day clinic. On the last day, in parallel with the Symposium, there will be courses on basic and advanced implantology and crestal sinus elevation. Courses will also be available on how to use a new implant system, specifically designed for narrow ridges. The social program will be just as attractive with a private visit to the Uffizi Gallery and the Vasari Corridor, exclusively opened for us. The gala dinner will be held at Palazzo Pitti. See you in Florence!

Cari Colleghi ed Amici

È con grande piacere ed onore che vi invito a partecipare al 2° Simposio Internazionale di Piezochirurgia che si terrà a Firenze il 13-14-15 Giugno 2013 al Palazzo dei Congressi. Ogni due anni i più grandi esperti di chirurgia ossea piezoelettrica si riuniscono per tre giornate per stabilire lo stato dell'arte e le prospettive future di questa fondamentale disciplina in odontoiatria e questo Simposio è un'occasione unica per conoscere in modo organizzato ed efficace i vantaggi clinici nella pratica di tutti i giorni in chirurgia orale, implantare ed ortodontica. La scelta di questo argomento è stata presa per rispondere alle esigenze pratiche degli operatori nell'attuazione delle loro terapie e per la diffusione del sapere e del fare. Il Simposio è organizzato in tre giorni: nel primo verranno trattati i temi della ricerca nella chirurgia piezoelettrica, la pratica dei clinici nel quotidiano e i primi dieci anni di esperienza sul rialzo del seno mascellare con l'uso di strumentazione ultrasonica. Il secondo giorno sarà dedicato all'implantologia con particolare riguardo alla preparazione ultrasonica del sito implantare e ai vantaggi clinici della ultra-osseointegrazione. La giornata di sabato vedrà confrontarsi illustri relatori esperti in ortodonzia chirurgicamente guidata. Infine verranno presentate innovative tecniche di chirurgia ortognatica. Per tutto questo abbiamo invitato quei relatori internazionali e nazionali di altissima competenza scientifica, capaci di applicare le loro conoscenze ed esperienza alla pratica quotidiana. L'ultima giornata di lavoro prevede la possibilità di partecipare, in parallelo al Simposio, ad innovativi corsi di implantologia con diverse sistematiche implantari e corsi monografici di tecniche di rialzo di seno crestale e di nuovi impianti per creste sottili. Il programma sociale sarà altrettanto attraente con la visita alla bella città di Firenze e accesso privato al museo degli Uffizi e del corridoio Vasariano, aperto per l'occasione, fino ad arrivare a Palazzo Pitti per la cena di Gala. Arrivederci a Firenze!

Parallel Industry Symposia: COURSES and HANDS ON
8.30 | 12.00

Andrea Tedesco
(Italy)

Zygomatic Implants and Piezosurgery Course

Abstract: In this course we will talk about the zygomatic Implants and their clinic application with the intra and extrasinusal approach, and we will discuss the use of Piezosurgery applied to these techniques.

SATURDAY 15

Parallel Industry Symposia: COURSES and HANDS ON
8.30 | 12.00

Pedro Peña Martínez
(Spain)

Piezosurgery and the Implant Direct Replant System. Theoretical and Practical Workshop on Site Preparation

Simone Verardi
(Italy)

Abstract: Piezosurgery has now become an important part of the surgical treatment of the mouth. Initially presented for sinus lift, osteoplasty and extraction cases, it has now become a successful system for implant site preparation. This technique enables to be accurate, effective and reliable. Knowledge of the inserts features and how to use them is however a requirement. The course is organised in a theoretical and a practical part: the former provides a description of the instrument features and how to use it ideally with the conic shaped Replant implant; the latter features hands on procedures on animal bone under the speakers' guidance.

Massimo Frosacchi
(Italy)

Workshop with Doctor M. Frosacchi and R. Sentineri

Rosario Sentineri
(Italy)

Abstract: During the theoretical presentation the operating principles of this Piezosurgery system will be described, highlighting the peculiar clinical advantages. In particular, the advantages for sinus lift surgery will be presented, for both crestal and buccal approach. Implant site preparation techniques will be shown, for both receiving sites with appropriate morphology and in combination with bone augmentation, as in the split crest technique.

Francesco Oreglia
(Italy)

Rex Implants. A Revolutionary Implant System

Claudio Stacchi
(Italy)

Abstract: Aim of this workshop is to introduce this revolutionary, innovative implant system specifically designed for reduced thickness ridges. Reduced thickness bone crests are a frequent issue in implant rehabilitation procedures. Today, this innovative surgical technique enables to treat cases previously treated with regenerative procedures. Two implant types will be presented that are placed with the help of a piezoelectric technique: the Bone Level and the Tissue Level systems. The speakers will describe the rationale of this technique, the criteria for case selection, the implant design and the experimental and clinical results of the study group who tested the new implant system. A hands-on part will follow, during which the speakers will demonstrate the steps involved in implant site preparation and implant placement. All participants will then have the opportunity to learn and experience, under the speakers' guidance, the different steps involved in the surgical protocol developed for the correct placement of the Rex Implants and consider the possibilities offered by this implant technique.

SATURDAY 15

INTERNATIONAL PIEZOSURGERY ACADEMY meets:
 Scientific Society "Il Giglio" of Florence
 10.00 | 12.30

Course of Updating (Italian language)

The Use of the Piezosurgery in Fixed Prosthesis

Moderator: **Giorgio Lombardo**

Speaker: **Domenico Baldi**

Free admission for the meeting for the Giglio and IPA Members

(Non Members € 90)

In aesthetic rehabilitation the final touch-up and repositioning of the finishing line is a critical moment for the final success. In this situation the use of non-rotating instruments can be a valid alternative to rotating traditional one. Using ultrasonic device we have a micrometric and precise cut that allows great control by the operator, without damaging of gingival tissues, thanks to its frequency range set (25-37 khz). According to these characteristics we can use a new component for piezoelectric instruments (Tipholder DB) which induces a similar-elliptic movement on the insert. This new tool provides both a movement comparable to sonic instruments and an enhanced patient comfort and high performance typical of ultrasonic instruments. Furthermore the innovative tipholder shape permits a great visibility on preparation phases and also allows reaching all tooth surfaces easily without removing the tip from the work area.

ELISABETTA CHIARI POSTER AWARD

The best research project related to Piezoelectric Bone Surgery (poster format) will be awarded with one last generation Mectron Piezosurgery® unit

Regulations

- The author submitting the work should be under 35 years of age.
- The abstract should be submitted in English and sent by e-mail no later than March 2013 to: gianmario.schierano@unito.it
- The name of the writer submitting the work should be written in bold.
- The abstract should include: objectives, materials and methods, results, discussion and conclusions, brief bibliography (indicate the five (5) bibliographic references that are the most relevant with the work submitted).
- Research subjects presented in the form of posters should be related to Piezoelectric Bone Surgery.
- If the poster presented outlines work already published then authorization from the journal where it was published, should be mentioned at the bottom of the poster.
- The size of the posters should be 100 cm in height and 70 cm at the base.
- For each abstract submitted the author and co-author should send full payment corresponding to the Symposium registration fee in the name of: Quintessenza Edizioni.
- Any co-author, who would like to register for the Symposium, should complete the registration form and submit payment as required.
- All posters will be exhibited in the poster exhibition area and marked with a number by order of submission.
- Poster will be hung up on Thursday June 13 at 10.00 a.m.
- Authors should be present in front of their posters on Friday May 14 at 04.30 pm in order to present and outline their work to the Judging Committee.
- Poster can be collected on Saturday at the Closing Remarks. The organization is not responsible for posters not collected.
- The winner will be awarded with one last generation Mectron Piezosurgery® unit, on Friday 14.

Location

Palazzo dei Congressi

Piazza Adua, 1 - Firenze

How to reach the congress venue:

www.firenzefiera.it/fierabook

Organizing Secretariat

Quintessenza Edizioni

Via Ciro Menotti, 65 - 20017 Rho (MI)

Tel. +39 02 93180821 - Fax +39 02 93509126

Mail: info@quintessenzaedizioni.it

Registration Fee

- The registration fee includes participation in scientific sessions, coffee breaks and lunches and certificate of participation.
- Registration is valid only when accompanied by the order of payment receipt.
- Registrations will be accepted in order of arrival only.
- The Organizing Secretariat will not accept additional registrations once the maximum number of participants has been reached.
- Changes may be made to program and schedule.

Cancellations and Reimbursement

- Any cancellations must be received by the Organizing Secretariat by May 13, 2013 (30 days prior to the Symposium). No reimbursements will be made after that date.
- Registration fees will be reimbursed for cancellations made before May 13, 2013 minus Euro 50 (21% VAT included).
- Should the Symposium not take place due to force majeure, participants will be entitled to reimbursement of the registration fee only.

Official Language: English

Simultaneous translation into Italian.

Video or photography will not be allowed during the symposium.

Florence: the town

Florence is situated in central Italy, in the heart of Tuscany, and the most developed area of tourism in the city is undoubtedly artistic-religious, thanks to the presence of innumerable works of art and churches. The historical centre of Florence is quite small, so it is easy to visit on foot. Often when we go somewhere far from home for a short or longer stay, we have doubts as to what to bring, how to move around, how to act, who to contact in case of emergency. For this reason we have tried to provide all the information necessary to ensure that you will have a wonderful holiday in Florence.

Turistic information

To discover Florence, one of the cities that everyone wants to visit at least once in their lifetime, a city beloved and sung by the greatest poets in the world and long the mecca of intellectuals, artists, travellers, and adventurers.

Pleasant itineraries winding through the streets, squares, churches, and museums of the historical centre of Florence, historical memories, legend, and atmospheres that for centuries have enchanted those who visit this marvellous land of light and art.

More information at www.firenzeturismo.it

Transportation

BY BUS. The public transportation network (ATAF & Li-nea s.c.a.r.l.) connects the city centre to the suburban area with over 100 urban and extra-urban lines.

More information at www.ataf.net

BY TAXI. Taxis can be called by phone or can be caught directly from the appropriate reserved taxi points, located in various parts of the city centre and in other areas.

Ph. +39 055 4390 - +39 055 4499

BY CAR. The city centre is a ZTL (Zona a traffico limitato - Limited Traffic Zone), controlled by cameras from 7.30 am to 7.30 pm, from Mondays to Fridays, and from 7.30 am to 6.00 pm on Saturday.
